PROFESSIONAL SUMMARY

Results-driven Front-End Developer with 5+ years of experience building interactive, scalable web and mobile applications. Specialises in Angular (v15-v21), TypeScript, Node.js, and Express.js. Proven track record of architecting Micro Frontend solutions, integrating AI-powered developer tooling (Claude AI & OpenAI Codex in VS Code), and delivering user-centred applications in Agile environments. Skilled in RESTful API integration, cross-functional collaboration, and performance optimisation.

TECHNICAL SKILLS

Frameworks & Libraries: Angular (v15 / v17 / v19 / v21), Angular i18n / Localization, Ionic Framework, Node.js, Express.js, NGRX, RxJS, Bootstrap

Languages: TypeScript, JavaScript, HTML5, CSS3, SCSS

APIs & Architecture: RESTful APIs, Micro Frontend Architecture, Google Maps API, Anthropic Claude API

Databases: MySQL

Tools & Platforms: Git, SVN, Visual Studio Code (with Claude AI & OpenAI Codex), Sublime Text, Agile / Scrum

PROFESSIONAL EXPERIENCE

Software Engineer

Krya Solutions Private Limited | Chennai, India | Jan 2025 – Present

AssureZen – Third-Party Risk Management (TPRM) Platform

Apr 2026 – Present

- Architecting and developing AssureZen, a Third-Party Risk Management application built with Angular 21, covering vendor risk scoring, due-diligence workflows, compliance and contract document tracking, audit trails, and real-time risk-exposure dashboards.
- Implemented multi-language and culture-specific (i18n) support, adapting date, number, and currency formats for a global user base.
- Leveraged Claude AI and OpenAI Codex for component scaffolding, boilerplate generation, and automated test-case creation — reducing feature delivery time by ~30%.
- Built role-based access control (RBAC) and detailed audit-logging capabilities to meet enterprise compliance and data-governance requirements.
- Designed a dynamic due-diligence questionnaire builder with conditional logic, enabling risk teams to tailor assessments by vendor category and risk tier.
- Set up automated risk-alert and notification workflows that flag overdue assessments, expiring contracts, and compliance breaches in real time.

Survey Management – Independent Survey & Feedback Microfrontend

Jan 2026 – Mar 2026

- Designed and built a standalone Survey Management microfrontend for survey creation, distribution, and response analytics, deployable independently of other modules.
- Delivered real-time analytics and reporting dashboards summarising survey responses across web and mobile.
- Integrated the microfrontend into Procurezen via a shared navigation shell and component library, feeding field survey and vendor-assessment data directly into supplier onboarding workflows.

Procurezen – Integrated Procurement Platform

Jan 2025 – Present

- Architected and developed Procurezen, a full-stack supplier and procurement management platform, as a microfrontend application using Angular (v21) for the frontend and Node.js / Express.js for the backend API layer, using Claude AI in VS Code to scaffold components and accelerate API integration.
- Developed comprehensive procurement management modules: supplier onboarding, product catalogue management, purchase order creation and tracking, multi-level approval workflows, and spend analytics dashboards.
- Implemented vendor evaluation and performance tracking features including scorecards, compliance document management, and contract lifecycle management.
- Integrated RESTful APIs to synchronise supplier and procurement data between frontend and backend systems in real time.
- Utilised Angular Reactive Forms with custom validators for complex supplier registration, document upload, and multi-step procurement request flows.

Software Developer

Intellect Design Arena | Chennai, India / Jeddah, Saudi Arabia | Apr 2023 – Nov 2024

- Developed web applications using Angular 17 and Micro Frontend architecture for Saudi National Bank.
- Built cross-platform mobile banking applications using the Ionic Framework.
- Enhanced financial applications for payment initiation, bulk payment processing, and transaction reconciliation.

- Conducted code reviews, managed production deployments, and mentored junior developers.

Frontend Developer (Client: Intellect Design Arena)

Digibyte Technologies Pvt. Ltd | Chennai, India | Aug 2022 – Apr 2023

- Built scalable web applications using Angular 15 for banking and financial clients.
- Converted user requirements into technical specifications and delivered production bug-fixes.
- Participated in peer code reviews and Agile development ceremonies.

Software Developer

Eazipoints System Pvt. Ltd | Chennai, India | Apr 2021 – Aug 2022

- Developed web applications for network signal surveys and access-point placement management.
- Integrated Google Maps API for real-time signal-strength visualisation and heatmap reporting.
- Built admin panels for user management, survey scheduling, and reporting dashboards.
- Collaborated with Nokia RGD team to enhance survey tools and optimise data collection performance.

UI Developer Intern

Orbio Solution Pvt. Ltd | Bangalore, India | Oct 2020 – Mar 2021

- Built and tested web applications using Angular, HTML, CSS, and Bootstrap.
- Participated in design sessions and implemented feature enhancements.

KEY PROJECTS

AssureZen – Third-Party Risk Management (TPRM) Platform

Apr 2026 – Present

Developing AssureZen, a Third-Party Risk Management application built on Angular 21 to help organisations assess, monitor, and mitigate risk exposure from vendors and external partners. Core capabilities include vendor risk scoring, a dynamic due-diligence questionnaire builder with conditional logic, compliance and contract document tracking, role-based access control, audit trails, automated risk-alert workflows, and real-time risk-exposure dashboards. Implemented multi-language and locale-aware (i18n) support, adapting date, number, and currency formats to different regional and cultural conventions for a global user base. Leveraged Claude AI and OpenAI Codex throughout the development lifecycle for rapid component scaffolding, code generation, refactoring, and automated test-case creation.

Survey Management – Independent Survey & Feedback Microfrontend

Jan 2026 – Mar 2026

Built a standalone survey creation, distribution, and response-analytics microfrontend, enabling users to design custom surveys and questionnaires, collect responses across web and mobile, and visualise results through real-time analytics and reporting dashboards. Architected as an independently deployable microfrontend and later integrated into the Procurezen platform to feed field survey and vendor-assessment data directly into procurement workflows.

Procurezen – Integrated Procurement & Survey Platform

Jan 2025 – Present

Built a full-stack procurement management system using Angular (v21) and Node.js / Express.js, architected as a microfrontend application. Integrated the standalone Survey Management microfrontend into Procurezen via a shared navigation shell and component library, allowing field survey and vendor-assessment data to feed directly into supplier onboarding and evaluation workflows. Core procurement features include supplier onboarding, product catalogue management, purchase order lifecycle, multi-level approval workflows, contract management, spend analytics, and vendor performance scorecards. Used Claude AI in VS Code to scaffold the project, auto-generate component structures, and accelerate API integration.

Saudi National Bank – Banking Application

Apr 2023 – Nov 2024

Developed and enhanced banking web applications using Angular 17 and Micro Frontend architecture for Saudi National Bank, Jeddah. Delivered payment initiation, bulk payment processing, and transaction management modules.

My Digi Force / Nokia Intuitive Survey & Planning

Apr 2021 – Aug 2022

Developed network signal survey web apps with Google Maps API integration for real-time visualisation; collaborated with Nokia RGD team on survey tool enhancements and performance optimisation.

EDUCATION

Bachelor of Engineering – Electrical & Electronics Engineering (EEE)

Panimalar Institute of Technology, Chennai | Aug 2015 – May 2019

LANGUAGES

Tamil (Native) | English (Proficient)
